Our Story

After seeing firsthand how last-minute cancellations and staffing gaps were affecting patient care, practice revenue, and the well-being of dental teams, we knew something had to change.

Traditional locum agencies were slow, expensive, and often let practices down when they needed help most.

CoverDent was founded to do things differently by combining technology, compassion, and transparency to deliver short-notice dental nurse cover you can count on.

Founder

Joshua Ketani

Founder & Director, CoverDent

Joshua founded CoverDent with a clear mission: to change how dental locum staffing works.

With a background in healthcare operations and a passion for fixing broken systems, Joshua built CoverDent around three principles – fairness, reliability, and respect for both practices and nurses.

We're not just a cover provider. We're a partner in keeping dental practices running smoothly every day.
